● To whom it may concern,

I am writing to express my interest in any suitable opportunity within your organization that aligns with my skills and experience. I am a licensed Mechanical Engineer with diverse experience in contractor management, plant maintenance, risk assessment, and project leadership. I bring over six years of practical experience in a copper smelting facility where I have served in various technical and leadership roles.

Currently, I work as a Contractor Management Advisor at PASAR Corporation, where I implement and oversee the Contractor Management Policy in alignment with Glencore standards. My role involves close collaboration with internal and external stakeholders, risk assessment facilitation, and continuous process improvement. I have also held positions such as Team Leader for Dore Operations, Mechanical Planner, and Risk & Assurance Advisor, all of which have equipped me with strong problem-solving, planning, and communication skills.

In addition to my technical qualifications, I am proficient in tools such as MS Office, MS Project, AutoCAD Inventor, SAP Business Client, and Oracle R12. My background also includes training in risk and critical control management, internal auditing, and leadership development. These have helped me lead cross-functional teams, coordinate complex shutdown projects, and ensure workplace safety and efficiency.

I am enthusiastic about bringing my commitment, adaptability, and continuous improvement mindset to your team. I am open to roles in engineering, project coordination, safety and compliance, or any opportunity where my background can create value.

Thank you for considering my application. I would welcome the opportunity to further discuss how my experience and skill set can contribute to your organization's success.

Kind regards,

Rolando Ecot, Jr.
