REMARKS

Cognitive Functioning, Mr. GOLIAT'S General cognitive ability falls under **Average** denoting his normal ability in dealing with intellectual endeavors under pressure. He is capable of completing activities requiring logic and scholastic skills.

Psychological Functioning, His responses shows that he tends to think through how he will complete a new task before starting to work on it; he tends to consistently complete very high quality work. It is likely that he is very organized at work and works quickly and efficiently. His coworkers might find him to be extremely diligent, responsible, and organized. More so, it is seen that he is well-driven towards his goals and aspirations in life.

Clinical Functioning, Profile is suggestive of self determination and favorable self-esteem. nonetheless, self reservation was noted. Dependency to others was also seen so far. Getting frustrated easily were also noted. No signs of depression was seen so far. Generally, his working personality is in good disposition.
