Category:
Agricultural/Farm
Supplies/Livestock

Funding Source: Trust Fund
Project Title/Code: 101T20201050-1.119

Item #	Item Description	Unit	Qty	Unit Cost	PAR/CS	Total Cost
1	Abaca Planting Materials	pcs	1500	26.00		39,000.00

Specification:

Height: The sucker should ideally be 1.0-1.5 meters tall to ensure good root and shoot development.

Number of Leaves: It should have at least 3-5 healthy, fully developed leaves.

Age: The sucker is typically 6-8 months old when ready for planting.

Rhizome Size: The rhizome should be healthy, with a diameter of at least 10-15 cm to support growth.

Roots: It should have well-developed, healthy roots with no signs of rotting or damage.

Pseudostem: The pseudostem should be firm and green, with no signs of disease or pests.

Leaf Color: The leaves should be vivid green, indicating good health and proper nutrient levels.

Weight: The sucker typically weighs 3-5 kilograms, depending on its size and maturity.

Free from Disease: The sucker must be free from diseases and pests, such as bunchy top virus or nematode infestation.

Leaf Sheath Condition: The leaf sheaths should be intact and undamaged, as these protect the growing point.

2	Long Sleeves for Farmers	piece	4	200.00		800.00
